

Press Release

Frankfurt am Main, Germany, July 1st, 2020

Dorsch Gruppe takes over projects and employees of Manns Ingenieure GmbH

- GRE German Rail Engineering GmbH as a 100% subsidiary of Dorsch Holding takes over the projects and employees of Manns Ingenieure GmbH
- Manns Ingenieure provides proficient engineering services in the fields of transportation, urban development and environmental protection
- Acquisition extends range of services of Dorsch Gruppe in the field of road and complex railway projects

The employees of Manns Ingenieure are joining Dorsch Gruppe, thus strengthening the service portfolio of one of the largest consulting engineering companies in Germany.

As of July 1, 2020, GRE German Rail Engineering GmbH (GRE) will take over the employees and projects of Manns Ingenieure GmbH (Manns) based in Wirges by an asset deal. Manns offers comprehensive engineering services in the fields of transportation, urban development and environmental protection and has excellent references.

For 25 years, Manns has been standing for competence in the sector of complex transport projects - i.e., from transport planning and object planning to project management as well as in the area of intelligent parking / telematically controlled truck parking (column parking).

"The employees of Manns are an excellent enrichment", explains Andreas Schweinar, CFO of the Dorsch Gruppe. "With this acquisition we are expanding our competence centre for road traffic and strengthening our market position in this segment."

It was agreed not to disclose the purchase price.

For almost 70 years, Dorsch has been a reputable consulting and engineering partner for clients from industry, private investors and public institutions. With around 2,000 employees Dorsch Gruppe ranges among Germany's biggest independent planning and consulting enterprises. Dorsch is represented internationally through 10 branch offices and numerous project offices in more than 40 countries. The portfolio of services comprises airports, transport and infrastructure, water and environment, building and urban planning, oil and gas, development cooperation as well as asset management.
